

Ready-to-B *Baseline*

The Pre-configured SAP for your business needs,. Simple, business process driven: the best-fit SAP application for Mid-Market companies.

Fact Sheet

SOA People developed the “Ready-to-B” business solution, a pre-configured SAP application, specifically designed for mid market business environments. It is also an accelerator for Large Enterprises projects.

Preconfigured and Fast Implementation

Our Solution

Ready-to-B is a collection of professional applications & services that deliver, in a prescribed manner, a pre-defined, pre-tested and pre-documented SAP solution.

Thanks to our ready-to-run pre-configured solution and to our large experience in your industry, we are able to deliver a full solution in a given timeframe and budget, in line with your needs and capabilities. .

Our offer includes:

- the SAP All-in-One licences,
- the Hardware
- the consulting services for:
 - the Project Management
 - the delta-requirements workshops,
 - the implementation of the defined scope
 - the technical installation of systems
 - the existing data upload
 - the key users training and documentation
 - the predefined forms & printouts
- the Go-Live support
- the Leasing Facilities
- the system and administration contract

The benefits of the READY-to-B™ solutions are:

Business solution based on standard SAP application, market leader in ERP solutions, which means availability of large number of resources to support, maintain and extend the functions of the solution Learning model based on Competences Transfer

- A User centric approach
- A Reduced implementation Risk, as it uses a reference business process and several pre-configurations.
- A tested preconfigured solution, reducing the SAP implementation budget while you can focus on your real business needs, based on the best-practice processes in READY-to-B™

End-User Service Delivery						SAP Newcover
Analytics	Strategic Enterprise Management	Financial Analytics	Workforce Analytics	Operations Analytics
